

CASE STUDY – UX DESIGN

IDENTIFY THE NEED OR PROBLEM 1

In many Indigenous communities, there is a disconnect between traditional knowledge holders and youth. Westernized systems often dictate how "culture" is taught, leaving youth feeling alienated from their heritage and struggling to define their own sense of belonging in the modern world.

HMW create leadership opportunities for Indigenous youth themselves so that they can define what culture and belonging looks like for their generation

CONCEPT DEVELOPMENT

3 Based on the research insights that we gathered, we selected a high-potential concept: a tailored virtual conference centered on Indigenous youth and mentorship. To visualize, communicate and map this digital experience, we built user-task flows and low-fidelity prototypes.

2 RESEARCH AND IDEATION

Once the problem was identified, a how might we statement was formed. From that we created and conducted a survey and then created participant personas and affinity mapped the responses using the insights and information gathered in the survey.

Research Goals:

1. To learn how to empower youth with leadership opportunities
2. What does culture and belonging look like to Indigenous youth?
3. Are there opportunities for Indigenous youth to become leaders?
4. What barriers can be identified to becoming leaders?
5. What does Indigenous leadership look outside of the Western Lens?

DESIGN REFINEMENT

4

In this step, we created a more in depth user-task flow and high-fidelity prototypes to better define our idea.

5

SUMMARY AND CONCLUSION

Our project addresses the need for culturally safe, accessible digital mentorship for Indigenous youth by developing a tailored virtual conference space [Project Dreamcatcher]. The project utilized personas, user-task mapping, prototyping, research and evaluation to ensure the platform is feasible and accessible. The platform creates a scalable, digitally safe ecosystem that empowers Indigenous youth. It allows them to lead conversations, build networks, and define culture on their own terms.
